markdown-resume.js

Turn a simple markdown document into a resume in HTML

Features

- PDF generation via wkhtmltopdf
- Responsive design for multiple device viewport sizes
- Simple Markdown formatting

Quickstart

The generated files will be put in the same directory as your source file.

```
# For usage on the command line
npm install -g markdown-resume

# Generate HTML file
md2resume my-resume-file.md

# Generate PDF file
md2resume --pdf my-resume-file.md
```

Running with docker

```
# Build a docker image
docker build -t md2resume .

# In the directory where your resume is, run the container
docker run -v $PWD:/src md2resume resume.md

# You can also generate the pdf format
docker run -v $PWD:/src md2resume -pdf resume.md
```

Run in Watch Mode w/ Live Reload

```
npm install -g light-server
light-server -s . -w "your_resume.md # md2resume your_resume.md"
```

Open http://localhost:4000/your_resume.html in a browser and see changes live.

Use as a node module

```
var md2resume = require('markdown-resume')

# Generate HTML
md2resume('my-resume-file.md', 'default')
.then(html)
    # ... do something with html
});
```

Acknowledgments

As above, this library steals pretty much everything from .
